IN THE CLAIMS:

1. (Amended) A deflection [Deflection] yoke for a color
 [colour] cathode-ray tube, comprising:
 a pair of horizontal deflection coils (3);[,]
 a pair of vertical deflection coils (4)[, these coils
 being intended to generate] for generating magnetic deflection
 fields perpendicular to a main axis Z[,];
 at least one of said [these] two pairs consisting of
 saddle-shaped coils[, the] having conducting wires [of each of
 the said coils being] arranged so as to form a front conductor
 assembly (25) and a rear conductor assembly (24)[, the two
 conductor assemblies being] connected to each other by lateral
 conductor bundles (26), and those parts of each of said coils
